LiSWT Treatment of Erectile Dysfunction

You’ve heard of shockwave treatment of erectile dysfunction, and you may have heard of LiSWT, but just exactly what is it. LiSWT stands for Low intensity Shock Wave Therapy or by some accounts Linear Shock Wave Therapy. Just what are shock waves and how can they treat Erectile Dysfunction (ED)? A shockwave is a positive pressure wave which has a very short rise time and is followed by a short negative pressure wave. The high pressure positive wave can be focused to release energy at a specific location. In the medical field shockwaves were first used, and are still used, to treat kidney stones. This use of shockwaves is meant to release very high intensity energy amounts at a small focal point. Originally the energy source was from a large spark plug through which thousands of volts were passed generating very high intensity shock waves which were focused at a single point. This source was called the electrohydraulic method. This was followed by an electromagnetic source and finally by a source which used Piezoelectric crystals to generate the shock waves.
These principles are demonstrated in the figure below.

**Shock Wave Production Methods**

**Electrohydraulic:**
Creation and collapse of plasma bubble in liquid medium

Peak Pressure: Highest
Rise time: nanoseconds
True shockwave at all settings
Optimal tissue coverage due to large focal volume; permits efficient protocols with fewer treatments and impulses

**Electromagnetic:**
Like charged plate collision

Peak Pressure: Medium
Rise time: microseconds
True shockwave at high energy settings only*

**Piezoelectric:**
Focused vibrating crystals

Peak Pressure: Lowest
Rise time: microseconds
True shockwave at high energy settings only*

As you can see regardless of the source, the intention was to generate high intensity shockwaves focused on a small area to release a high amount of energy at the focal point. Later it was discovered that shock waves could be used at much lower energy levels, and if they were de-focused, a whole host of different biologic effects were noted. It was soon determined that low energy shock waves could be used to treat non healing bone fractures, tendonitis, heel spurs, non-healing wounds and recently erectile dysfunction. In virtually all of these other uses the basic biologic mechanism of action appears to be that the shock waves allow the body to release vascular growth factors which result in the formation of new blood vessels and tissue healing. Recently low intensity shockwaves have also been used to treat ED. Low intensity
shockwave therapy is being used in both focused and unfocused modes in many countries around the globe. In addition 2 machines which use unfocused shockwaves have been designed to produce linear focal zones to cover treatment areas more uniformly resulting in higher treatment success rates. No machines designed to produce low intensity shock waves to treat erectile dysfunction have been approved for this use in the United States of America. As a Urologist, I have been using shockwaves to treat medical illnesses for greater than 30 years. Recently I traveled to Germany to visit clinics using this technology to successfully treat erectile dysfunction. I learned the techniques and the perils and pitfalls of the procedure. I have acquired a machine designed to treat other problems which with appropriate mechanical offsets will produce a linear shockwave pattern that can be used to treat ED. This use is considered off label use of this machine. Off label use, simply means that I am solely responsible for this use of this technology, and that it has NOT been officially approved in the US. I can state that currently medical studies are in progress in the United States and I believe that this treatment will be approved in the US in the not too distant future. I can also state that the technique I am using is virtually identical to that used in Germany with great success.

What does this mean for me?

You will be given several questionnaires which are used to determine just how severe your condition is. It is critical that you answer the questions as accurately as you can. Try NOT to underestimate or overestimate your problem. Although there are tests we
can use to objectively determine just how well your penis works, they are painful, invasive, or both. Hence we use the subjective evaluation method with medically validated questionnaires. The number of shockwaves administered is based on the results of these questions and your concomitant medical problems (if any exist). You will also be asked to answer the same questions one month after your final treatment so that I can continue to improve my technique and personally compare my outcomes to other persons reporting their outcomes worldwide.

The **Historical standard** treatment protocol throughout the world, and used in almost all published accounts, has been 4,000 shockwaves delivered per treatment, once per week, for 4 treatments. In recent months (this area is a “hot” area of research and changes rapidly) this has been expanded to 2 additional treatment sessions, if the patient has received improvement but wants to try to receive additional benefits. In addition one physician, Dr. Motil, who uses the almost identical technology I will be using, (and has among the largest experience in the world with this technology), has published a nomogram outlining his recommendations concerning the optimal number of shocks which should be delivered per session. The number of shocks delivered to you the recipient, will be decided by you, after all the information is obtained and processed through the available algorithm and the options are discussed with you. The number of shockwaves delivered per session is important because, not only may it change the outcome, but the charges for the treatment are determined by the number of shockwaves used.

**What is required of me?**

- You will be asked to fill out the questionnaires to the best of your ability.
• You will undergo a basic medical history and physical.
• You will discuss with me the chance of your success with these treatments and any risks involved.
• You will be given a charge estimate of what the 4 treatment package will cost, based on the standard protocol or the protocol as recommended by the Motil algorithm. The additional 2 treatment package, if agreed to, will be one half the costs of the first 4 sessions. All agreed to charges must be received and processed as paid by the company who leases the machine to me before either the 4 or additional 2 treatment package can be started.
• You will be asked to sign a release and disclaimer form stating that you have been informed that this is an off-label treatment and results can NOT be guaranteed. In addition, you will be confirming that as an off-label treatment you will NOT try to file for any insurance reimbursement as doing so might be considered insurance fraud which could be punishable by fines or imprisonment.
• You will be requested to agree to fill out the questionnaires at one month post treatment and file those results back with me.
• We will agree to your treatment dates and times.
Demographic Information

Name:  First ___________________ MI _________  Last______________  Suffix _____
Address:  Street _________________    City________________ State____  Zip _____
DOB: (MM/DD/YYYY) ___________________ SSN __________________
Home Phone Number ____________________   Cell Phone Number______________
Email Address _______________________

Did someone refer you to us for this treatment?  Yes   No   Who __________________

Basic Medical Information

Drug
Allergies__________________________________________________________

Height ____________    Weight ____________

Do you smoke?     Yes      No

Do You use oral chewing tobacco?     Yes     No

How long have you had this problem?   __________ Years   Mon

Have you been treated with oral medications for this problem?   Yes   No

Are you currently using this medication to help with your erections?  
Yes     No

Do you have any hormonal, Neurologic or psychologic problems?   Yes   No

Do you have any of the following problems?

High blood Pressure   Yes   No

Cholesterol or triglyceride problems    Yes   No

Coronary heart disease   Yes   No
EXCLUSION CRITERIA

These exclusion criteria were used in almost every clinical trial of this technology. For the study they were absolute (If you had any of these you would NOT be treated), At this time, they are relative exclusions and some men these problems are being treated worldwide. These must be discussed with your physician.

Have you had prostate cancer surgery or any other extensive pelvic surgery? Yes No

Have you had ANY cancer in the past year? Yes No

Do you have any unstable medical, psychological, spinal cord injury problems, or penile anatomic problems? Yes No

Do you have any clinically significant chronic hematologic disease? Yes No

Do you take Anti-Androgen Medications Yes No

Have you had any radiation therapy treatments to the pelvic region? Yes No

Do you take any blood thinners? Yes No

Do you have any other significant medical history I should be aware of?
Erectile Function Questions:

It is very important that you attempt to answer the following questions very accurately. Please do not try to overestimate or underestimate your condition. Circle your answers on the chart below.

**The International Index of Erectile Function (IIEF-5) Questionnaire**

<table>
<thead>
<tr>
<th>Over the past 6 months:</th>
<th>Very low 1</th>
<th>Low 2</th>
<th>Moderate 3</th>
<th>High 4</th>
<th>Very high 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. How do you rate your confidence that you could get and keep an erection?</td>
<td>Almost never/never 1</td>
<td>A few times (much less than half the time) 2</td>
<td>Sometimes (about half the time) 3</td>
<td>Most times (much more than half the time) 4</td>
<td>Almost always/always 5</td>
</tr>
<tr>
<td>2. When you had erections with sexual stimulation, how often were your erections hard enough for penetration?</td>
<td>Almost never/never 1</td>
<td>A few times (much less than half the time) 2</td>
<td>Sometimes (about half the time) 3</td>
<td>Most times (much more than half the time) 4</td>
<td>Almost always/always 5</td>
</tr>
<tr>
<td>3. During sexual intercourse, how often were you able to maintain your erection after you had penetrated (entered) your partner?</td>
<td>Extremely difficult 1</td>
<td>Very difficult 2</td>
<td>Difficult 3</td>
<td>Slightly difficult 4</td>
<td>Not difficult 5</td>
</tr>
<tr>
<td>4. During sexual intercourse, how difficult was it to maintain your erection to completion of intercourse?</td>
<td>Almost never/never 1</td>
<td>A few times (much less than half the time) 2</td>
<td>Sometimes (about half the time) 3</td>
<td>Most times (much more than half the time) 4</td>
<td>Almost always/always 5</td>
</tr>
<tr>
<td>5. When you attempted sexual intercourse, how often was it satisfactory for you?</td>
<td>Almost never/never 1</td>
<td>A few times (much less than half the time) 2</td>
<td>Sometimes (about half the time) 3</td>
<td>Most times (much more than half the time) 4</td>
<td>Almost always/always 5</td>
</tr>
</tbody>
</table>

**Erection hardness score:** My Score from the Choices below is _________

Score 0 - Penis does not enlarge.

Score 1 - Penis is larger, but not hard.
Score 2 - Penis is hard, but not hard enough for penetration.

Score 3 - Penis is hard enough for penetration, but not completely hard.

Score 4 - Penis is completely hard and fully rigid.

From the Diagram above please pick the score (circled number) that best illustrates the angle of your usual erection.

My Score is ________

How often do you awaken in the morning with an erection?
1. Never  2. Sometimes  3. About half the time  4. Often  5. Almost every day

My score is  ________

WHAT NOW?

Now that I answered all these very personal questions what does this mean to me and what can I expect?

Your answers to these questions will be recorded into an electronic medical record and scored. You will complete a brief physical exam and you will than review all these findings with Dr. Mosca.

If you elect to go forward with treatment:

- You will be asked to sign the release of liability and disclaimer form.
- You will be asked to pay for the first 4 treatment sessions and your appointments will be scheduled. Your treatments will NOT be started until Dr. Mosca’s office has been informed of receipt and processing of payment.

How likely is this treatment going to be successful and is it painful?

Do you remember the IIEF-5 Questionnaire you just filled out? Those questions are scored as follows:
Statistically speaking scores of 5-8 must improve by 7 points or more, scores of 9-14 must improve by 5 points or more and scores of 15-21 need only to improve by 2 points or more to be considered a statistical success. But who cares about statistics, you want to know if you will be happy with the treatment and you will consider it a success. Based on available medical literature and personal discussions with physicians providing this treatment it appears as if approximately 80% of patients were statistically improved. In addition approximately 77% of these men said they were satisfied or very satisfied with their treatment results and just over 80% of these men said they would recommend the treatment to others. This treatment has been VERY successful worldwide. Indeed even 50% men with very severe erectile dysfunction who do not respond to medications have reported converting to men who do respond to medications! NO man reported any pain with this treatment.

How much does it cost?

The treatment sessions are scheduled as a block of 4 treatments at one week apart with the possibility of two additional treatments. The total number of shockwaves delivered determines the cost of the procedure. The historical standard of 4 treatments of 4,000 shockwaves per treatment would equate to 16,000 total shockwaves for the 4 treatment block. The cost of this 4 treatment block would be $1,600. If you were to receive 6,000 shockwaves per treatment the cost for the 4 treatment block would be $2,400. Any payment must be remitted to PatientDirect Healthcare, LLC. When Patient Direct Healthcare LLC confirms the appropriate
payment to Dr. Mosca your treatments can begin. If you elect 2 Additional treatments you will once again have to make payments to PatientDirect Healthcare LLC before those 2 treatments can begin.

Charge Estimate for LiSWT (Energy Wave Therapy) treatments delivered by Dr. Mosca

Choice 1:
Historical Standard of 4,000 shockwaves for 4 treatment sessions:
My charge would be $1,600

Choice 2:
By using the Motil Algorithm it is estimated that I would do best with ________ shockwaves per treatment session for 4 treatment sessions.

My charge would be $____________.

I have elected to use choice _______ and agree to pay to PatientDirect Healthcare LLC $__________.
AUTHORIZATION AND CONSENT FOR OFF LABEL MEDICAL TREATMENT

PLEASE READ THE FOLLOWING INFORMATION CAREFULLY. IF YOU HAVE ANY QUESTIONS REGARDING THE INFORMATION, ASK FOR FURTHER EXPLANATION.

I,_________________________________________, hereby request treatment for erectile dysfunction utilizing energy wave therapy which I understand, although no specific result is guaranteed, is expected to improve erectile dysfunction.

The treatment will be provided by, Philip Mosca MD, the "administering physician", at Clinical Urology, Inc., 4200 South Douglas Avenue, Suite 300, Oklahoma City, Oklahoma. I understand that other appropriate personnel may be involved in the treatment.

I understand that the device to be utilized in providing the treatment has been listed with the United States Food and Drug Administration ("FDA") with an intended use as a therapeutic massager and that utilization of the device for treatment of erectile dysfunction may be considered an "off-label" use.

I acknowledge that the administering physician has explained to me, given me an opportunity to ask and satisfactorily answered questions regarding the: device use; the manner of treatment, its purpose and nature, and its reasonably foreseeable risks; and alternatives treatments for erectile dysfunction.

I understand that the reasonably foreseeable risks of the treatment include reddened skin, soreness at the treatment site and failure to improve erectile dysfunction. Additionally, I acknowledge that the administering
physician has explained to me, and I understand, that that there may be risks which are unexpected or not reasonably known and that the long-term effects of the treatment are not known.

I understand the reasonable alternatives to the treatment (which include penile injections, urethral suppositories, vacuum erection devices, pharmaceutical treatment, and/or implantable penile prosthesis), possible consequences of remaining untreated, and the risks and possible complications of each alternative.

I understand that the practice of medicine is not an exact science, that it may involve medical judgments based on the facts known to the physician at the time, and that it is not reasonable to expect the physician to be able to anticipate or explain all possible risks and complications. I understand that an undesirable result does not necessarily indicate an error in judgment, and that no guarantee as to the results has been made to, or relied upon by, me.

I understand that I have the right to refuse to receive the treatment.

I understand that a portion of the Energy Wave treatment fee will be paid to PatientDirect Healthcare, LLC and/or affiliates to compensate them for management services, equipment rental and/or technician services provided by them.

I understand that I will be asked to complete post treatment questionnaire. While this is NOT required by me doing so may help Dr. Mosca’s treatment of other patients in the future.

In full agreement with and understanding of all of the above statements, I request the administering physician to provide energy wave therapy erectile dysfunction treatment to me utilizing a device that may be considered off-label when utilized for treatment of erectile dysfunction

ADMINISTERING PHYSICIAN’S DECLARATION

I have explained to the patient/patient’s representative the energy wave therapy erectile dysfunction treatment with a device that may be considered off-label when utilized for treatment of erectile dysfunction and the risks, benefits, recuperation and alternatives (including the likely consequences if no treatment is pursued). I have answered all of the patient’s questions and to the best of my knowledge, I believe the patient has been adequately informed.
PATIENT’S CONSENT AND RELEASE

I HEREBY CONSENT TO ENERGY WAVE THERAPY ERECTILE DYSFUNCTION TREATMENT WITH A DEVICE THAT MAY BE CONSIDERED OFF-LABEL WHEN UTILIZED FOR TREATMENT OF ERECTILE DYSFUNCTION AND ACCEPT ALL THE RISKS INHERENT IN IT. I HAVE READ AND FULLY UNDERSTAND THIS CONSENT FORM. I UNDERSTAND I SHOULD NOT SIGN THIS FORM IF ALL ITEMS, INCLUDING MY QUESTIONS, HAVE NOT BEEN EXPLAINED OR ANSWERED TO MY SATISFACTION, OR IF I DO NOT UNDERSTAND ANY OF THE TERMS OR WORDS CONTAINED IN THIS CONSENT FORM. I UNDERSTAND THAT I CAN WITHDRAW THIS CONSENT AT ANY TIME BEFORE THE BEGINNING OF THE TREATMENT. IF YOU UNDERSTAND AND AGREE WITH THE INFORMATION IN EACH PARAGRAPH ABOVE, PLEASE PLACE YOUR SIGNATURE BELOW.

DO NOT SIGN UNLESS YOU HAVE READ AND THOROUGHLY UNDERSTAND THIS FORM.

PATIENT SIGNATURE __________________________ DATE ______ TIME ______ PRINTED NAME __________________________

WITNESS TO PATIENT SIGNATURE _______________ DATE ______ TIME ______ PRINTED NAME __________________________
